Let  $g$  be a continuous function with  $g(2) = 5$ . The graph of the piecewise-linear function  $g'$ , the derivative of  $g$ , is shown above for  $-3 \leq x \leq 7$ .

- Find the  $x$ -coordinate of all points of inflection of the graph of  $y = g(x)$  for  $-3 < x < 7$ . Justify your answer.
- Find the absolute maximum value of  $g$  on the interval  $-3 \leq x \leq 7$ . Justify your answer.
- Find the average rate of change of  $g(x)$  on the interval  $-3 \leq x \leq 7$ .
