Part II: Free Response

Show all work BELOW THE LINE. No credit will be given for anything written above the line on each problem.

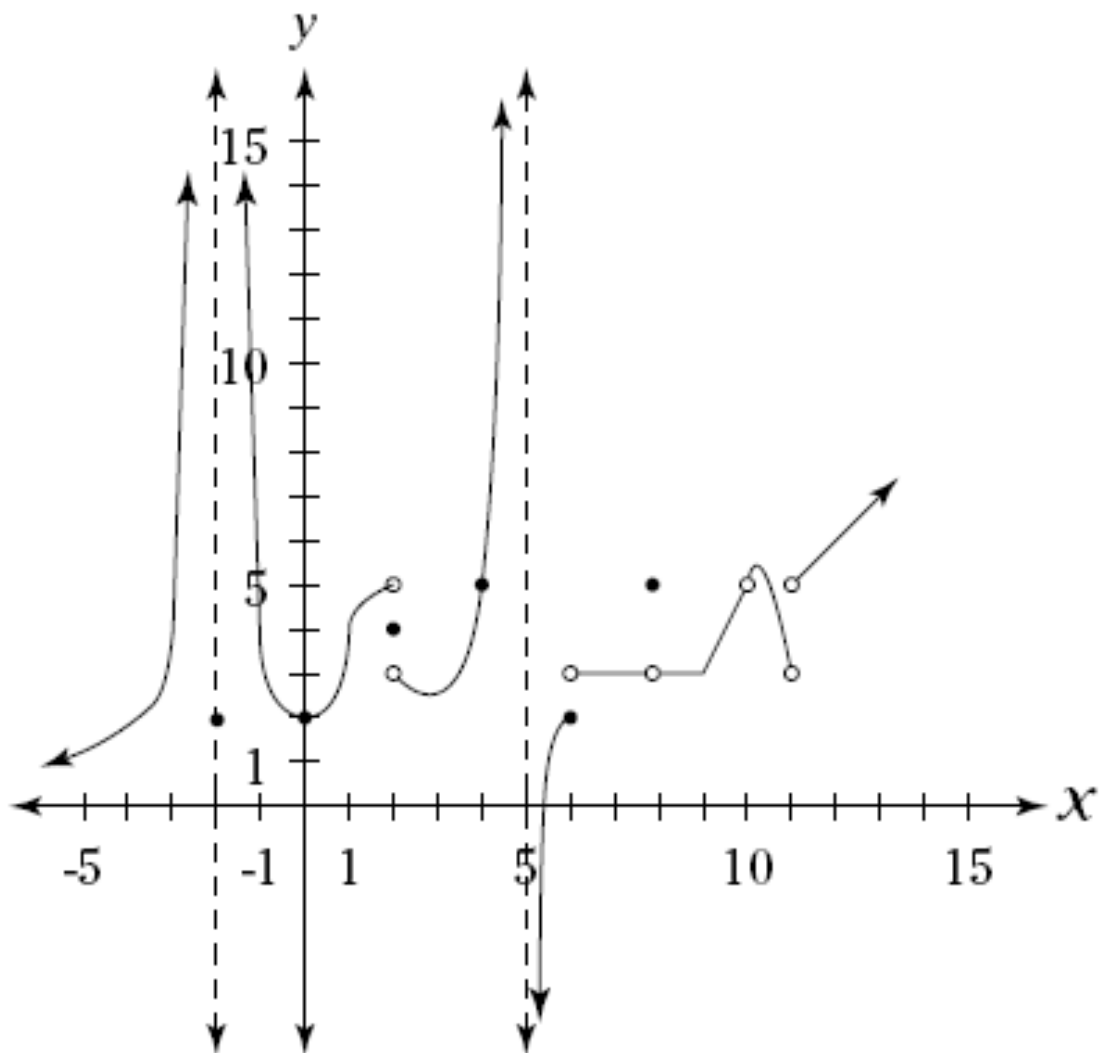

8. For the equation below

(a) Sketch the following piecewise function. Be sure to label the axes at points where the graph changes, show all asymptotes, and clearly show open vs. closed circles.

(b) Using the 3-step definition of continuity at a point, determine if the function is continuous at $x = 0$.

$$f(x) = \begin{cases} 3 - x^2, & x \leq 0 \\ 2, & 0 < x < 5 \\ \sqrt{x-1}, & x > 5 \end{cases}$$

9. Given the graph of the following piecewise function $f(x)$, answer the questions that follow.

(a) $\lim_{x \rightarrow -2} f(x) =$

(d) $\lim_{x \rightarrow 8} f(x) =$

(b) $\lim_{x \rightarrow 2^+} f(x) =$
