Part II: Free Response
Show all work in the space provided. As always, use proper notation, and show the work that leads to your answer. Remember that on this section, your PROCESS is as important as your PRODUCT.

(a) What is the equation of the Horizontal Asymptote?
(b) Is $f(x)$ even, odd, or neither? Justify by showing the algebraic test with result.
(c) Factor both the numerator and denominator completely.
